

PATENT NO. 377984
COCRYSTALS OF NARINGENIN

APPLICATION NO. 201711008153

APPLICANT
Punjab University

ABSTRACT

A cocrystal of naringenin and a pharmaceutical composition comprising a therapeutically effective amount of the cocrystal of naringenin is disclosed. The cocrystal of naringenin comprises naringenin and a cocrystal former selected from a group consisting of isonicotinamide, picolinic acid and succinimide. A process for preparing a cocrystal of naringenin is also disclosed. The process comprises grinding a mixture of naringenin and a cocrystal former, and adding a solvent to the mixture during the grinding to form the cocrystal; and recrystallizing the cocrystal formed.
